

- Fly-103-D stadium seat is mounted with sleeper (rail system). The sleepers are mounted at the height of the riser and optionally on the riser (step front) or on the floor. Thanks to the sleeper system, the seats can be fixed easily and quickly. Thanks to this system, it is possible to adapt the space to the desired capacity, to adjust the distance between the seats or to make possible product and layout arrangements easily. Thanks to its center of gravity system, Fly-103-D stadium seat is maintenance-free throughout its lifetime.

- The plastic seat and back used in the seats are manufactured as PP or PE by blowing method. Thanks to the internal metal construction in the seat front, the durability of the product has been maximized. Fly-103-D stadium seat has furnished fronts integrated into the back and seat parts of the seat. The furnishing area on the back front allows logo and advertising applications. The furnishing used in the seats is manufactured with additives resistant to UV, abrasion, chlorine and combustion. Fly-103-D stadium seat has PP injection armrest. Armrests can optionally be manufactured in common or as two pieces for each stadium seat. Armrests are connected to the sleeper system. The numbering area under the seat front and the optional sleeper row number allow users to find their places more easily and quickly. Thanks to the thin structure of the seat, it is possible to relieve the circulation on the steps and increase the capacity.

TECHNICAL SPECIFICATIONS:

- Compliance with the EN ISO 11925-2 and 13501-1/E class with non-combustibility additive.
- The metal parts of the seats are designed and manufactured from 6 mm one-piece sheet metal without welding, by laser cutting and bending in press molds.
