

- Mod-401 is designed to be used in substitute player benches or units thanks to its ergonomic and robust structure. Mod-401 substitute player seat has a monoblock sponge structure. Polyurethane sponge structure and furnishings on metal frame are manufactured with non-combustibility additives. 4 mm lamination is applied to the furnishings used in Mod-401 substitute player seat.
- The furnishing area on the back front allows logo and advertising applications. The furnishing used in the seats is manufactured with additives resistant to UV, abrasion, chlorine and combustion. Mod-401 substitute player seat is mounted on metal stand. The stand on which the seat will be mounted is arranged according to demand. Thanks to the monoblock structure of the seat and its metal bottom chest, it allows the use of seat heating systems in the seats.

TECHNICAL SPECIFICATIONS:

- 50+- 10% density polyurethane filling sponge on metal frame.
- Artificial leathers used in furnishings are manufactured with additives that provide high resistance against salt, UV rays, fire and chlorine.
